## Detailed Action

The amendment filed on 3-11-2005 has been entered.

### Claims Objection

Claims 1-11 are objected to because of the following informalities:

In claim 1, line 9, "crossection" is incorrect.

Appropriate correction is required.

### Claims Rejection - 35 U.S.C. 102(e)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Tachibana et al. (U.S. Patent No. 6,688,005).

Tachibana et al. show a reciprocating power saw (Fig.2) having a housing (2,6), a motor driven reciprocating stroke bar (20) with a tool receptacle (i.e. the blade holder for receiving a saw blade 27, see Fig.2) arranged at a free end of the stroke bar (20), and a bearing means (62) bearing the stroke bar (20) in a tool-side end zone of the housing (2,6) axially displaceable and pivotable, wherein the bearing means (62) has a guide part with a bearing passage (see Figs.2-3) for receiving the stroke bar (20), and wherein the bearing means (62) is mounted in a receiving passage (see Figs.2-3) in the housing (2,6) by an elastic secondary bearing element (30), and the secondary bearing element (30) is made at least in part of an elastic material (i.e. rubber, see column4 , lines 60-61) as claimed. Further, the elastic secondary bearing element (30) is considered a circular ring (of a wide band type), and its cross-section is circular as claimed.

#### **Indication of Allowable Subject Matter**

Claims 3-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**Remarks**

Applicant's arguments filed on 3-11-2005 have been fully considered but they are not persuasive. Applicant argues, at page 5 of the amendment, Tachibana's secondary bearing element is not configured as a circular ring. Examiner disagrees. Tachibana's secondary bearing element (30) is indeed a circular ring having a wider band. Further, it has a circular cross-section (see Fig.3) as claimed.

**Action Made Final**

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

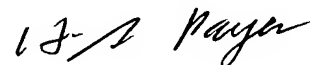

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
